Recommended sites for childhood vaccinations in NSW

JULY 2020 SCHEDULE

Before Vaccination:

- Adrenaline Kit readily available.
- Confirm vaccine cold chain maintained.
- Pre-vaccination checklist attended.
- Identify all medically at risk children and Aboriginal⁺ children – requiring additional vaccines as per AIH* online.
- Check child's immunisation history on AIR[^].
- Informed consent obtained and documented.
- Check if the vaccine needs to be reconstituted.
- Ensure correct vaccine for age and give all schedule vaccines in one visit if possible.

Post Vaccination:

- Child remains in clinic for 15 minutes.
- Provide parent/carer with Handout *What to Expect & What to Do?*
- Add recall reminder for next visit.

Bexsero®

- Children <2 years of age are recommended to receive prophylactic paracetamol 30 minutes before or as soon as practical after Bexsero® vaccination.
- Advise parent/carer to follow up with 2 more doses of paracetamol given 6 hours apart, regardless of whether the child has a fever.
- Children <2 years of age can receive Bexsero[®] with other scheduled vaccines.
- Children <2 years of age can receive Bexsero[®] separately from other infant vaccines, with a minimum interval of 3 days.

At Risk Groups

- MenB, MenACWY, pneumococcal and/or HIB vaccines are funded for all people with:
- Asplenia,
- Hyposplenia,
- Complement deficiency
- Treatment with Eculizumab
- Refer to AIH* online.

Aboriginal⁺: is inclusive of Aboriginal and Torres Strait Islander people AIH* online: Australian Immunisation Handbook online AIR^{*}: Australian Immunisation Register
